

Cyber Security Is Our Shared Responsibility

Use different passwords for different accounts

Work Accounts

Bank Accounts

Credit Cards

Email Accounts

Social Networks

Using the same password for all of your online accounts is like giving everyone a key to your house.

If you use the same login credentials across the Internet, it won't take long for a savvy hacker to identify multiple places they can use your stolen password.

Passwords should have at least ten characters and include upper and lower case letters, numbers and symbols.

Example: L8r_L8r&Not2day
