John Willinger, DMHMRSAS
Marie Greenberg, SCC
Maria Batista, DMV

Commonwealth Security and Risk Management Staff attending:

Jon Smith, VITA

IAM Committee members absent:

James Austin, VDOT
Joel McPherson, DSS

Also attending:

Peggy Ward, VITA
John Green, VITA
Eric Taylor, NG

NG is researching and IAM solution for the enterprise

- Committee discussed what the goals and accomplishments of the IAM committee are.
- Eric Taylor explained the NG is currently looking into what the enterprise needs are and what the industry needs and standards are.
- IAM Committee is looking for an IAM concept that addresses the whole Commonwealth.
- IAM Committee doesn't provide a technical solution. NG knows the technical solutions in the industry. NG has many IAM solutions out there with other customers. NG may have some "reach back" ability to their other "towers" to consult on IAM solutions that NG has implemented.
- "Reach Back" capabilities to other towers within NG may be complicated as far as billing goes, IAM Committee doesn't have funding.
- Two approaches moving forward are:
 - COV defines requirements and NG implements
 - COV and NG work together to define requirements and share information and research.

Next Steps:

- IAM Committee meet for a working lunch (Caesars 4/2/2009, 12pm – 2pm)
- Schedule Peggy Ward, John Green, Bill Ross, Don Kendrick, and Erik Taylor to meet with the IAM Committee during the next IAM Committee meeting to discuss working with NG moving forward.

Next Meeting:

April 21, 2009
2:00 – 3:00pm
Washington Conference Room CESC
