Address Points Data Standard Workgroup

29 Sept. 2016
Michael Vojta
April Branton

Welcome and Introductions

Virginia Geographic Information Network meeting of the Address Points Data Standard work group committee.

VGIN leads:

- **April Branton: Geospatial Data Analyst**

- **Michael Vojta: Geospatial Data Analyst**

- **Dan Widner: VGIN Coordinator**

Agenda

1. **Welcome and roll call**
2. **Review talking points (considerations)**
   - **Field items to be reviewed for current and future operational needs**
   - **Easier to have something you do not use than to not have a place holder for it if you need it later**
   - **Think long term**

Talking Points

Emergency Service Number – to be removed?

- **Not included in NG9-1-1 guidelines**
- **Would this be needed until new technology in place?**
- **Yea or Nay?**

Talking Points

Address Range – to be removed?

- **stacked points allow addressing or subaddressing provided unique**
- **Yea or Nay?**

Talking Points

Accommodations for emergency response vehicles (helicopters, rescue boats, as well as wheeled vehicles)

- **Potential to carry incorrect information may outweigh positive information**
- **Excessive "cost" to coding**
- **Land cover will be a better resource**
- **Yea or Nay?**

Talking Points

Street Name Abbreviations

- **Abbreviations should be allowed if, and only if, the abbreviation is the official name from the addressing authority**

- **As opposed what the guy painting the street name sign can fit across the sign**

- **Yea or Nay?**

Talking Points

Neighborhood

Sub-division names provide access point location reference to vehicular access

- **Higher level geo-position reference for "vague" location calls**
- **What cost coding?**
- **Yea or Nay?**

Talking Points

Subaddressing fields

- **Should sub-addressing be broken out into 3 columns: Floor, Unit, Room? (3 fields)**

or

- **Should the sub-addressed number/name be follow by a sub-addressing type that would include the Floor, Unit, Room as a category type?   (2 fields)**

Talking Points

Location Type - Define point location as to building, access point, parcel center, or landmark with in a parcel

- **Needed for multiple points per addressed site**
- **What cost coding?**
- **Yea or Nay?**

Talking Points

Add data provider field for source not local government

- **Identify contracted source of data**
- **Would address points layer contain a mix of different sources?**
- **Yea or Nay?**

Talking Points

Any other issues or questions?

- **Yea or Nay?**

Next steps

Meeting schedule and topics

1. Charter kickoff (17 August 2016)
2. AP attributes (31 August 2016)
3. AP geometry issues (7 Sept 2016)
4. Talking Points (29th Sept 2016)
5. Send out draft AP Standards doc
6. Findings and Summary (date/time ?)

DoodlePoll for scheduling
