### COMPREHENSIVE PROJECT DESCRIPTION

**Describe how the education/training is 9-1-1/public safety communications specific and how this will benefit E-911 and the employee(s) and/or PSAP.**

Having staff attend the fall conference is a major continuing education point for our PSAP. It allows staff to keep up on cutting edge trends, brush up on other skills, as well as network with other agencies. Our current CAD is end of support and will need to be replaced. Having the chance to go out of the office for this conference is also a HUGE morale booster which is much needed with our PSAP.

## EVALUATION

**Describe the evaluation process that will be used to determine if participation in this education/training benefited the PSAP and/or supported E-911 and GIS.**

Attendance at the conference has been spread across the shifts in the communications center to include dispatchers from days, swings, and graveyard shifts. This will allow best practices and other info garnered from the break-out sessions to be shared with all staff. Additionally, we have a range of experience attending from beginners with less than twenty years on the job to senior dispatchers with over 20 years public safety communications experience. Our staff in attendance includes those who are very adept at learning new technologies and will probably become power users of the selected program, and those who have difficulty adapting to new software. They will be asked to share their notes on various CAD systems for selection by the county as the vendor of choice moving forward in 2018.
