

Report Title: IT Strategic Plan Summary

Agency: 912 Department of Veteran Services

Date: 4/17/2017

Current Operational IT Investments

In this section, describe the high-level strategy the agency will use to manage existing operational IT investments over the next year to 5 years. This section should align with identified Business Requirements for Existing Technology (BReTs). At minimum, please address the following questions in your description of your agency's strategy for managing existing operational IT investments:

Are there existing IT investments that will require additional funding over the next year to 5 years, such as license renewals, re-competition of current IT contracts, or system enhancements required by the Agency Strategic Plan?

If there are systems that will no longer support the agency's business needs, either through poor performance or excessive cost, how does IT leadership in the agency plan to address the issues?

If the agency does not have the staff or funding to meet increasing demand for IT services, how will IT leadership fulfill the requests?

DVS has no IT investments that will require additional funding over the next several years. We are currently working with VITA/NG to upgrade infrastructure as required by the ITP and as needed as part of our overall IT strategic and business needs. We will continue to evaluate the cost effectiveness and need for our current infrastructure systems and will eliminate unnecessary systems as we see fit. DVS has very small IT staff and very limited funding to address the constant and growing needs for IT needs in our agency and requirements by VITA/NG. For all DVS cloud/hosted applications (i.e. Point Click Care, Benevets, eVeterin, VMSDEP, and the DVS Website, DVS relies on VITA- managed vendors acquired from the AINS contract to provide development and hosting services. The DVS IT support staff handle all of the VITA/NG out of scope technology support services and coordinates with VITA/NG on all in-scope technology support services. The DVS IT Team was able to add one FTE position during the FY15 cycle, but lost one wage employee. The DVS CIO will continue to work with DVS Leadership to obtain staffing to meet the continually growing demand for internal IT support.

Factors Impacting the Current IT

In this section, the agency will describe the changes in their business environment that will require or mandate changes to the agency's current IT investments. These are requirements and mandates from external sources, such as other agencies or business partners, the agency's customer base, product and service providers, or new federal or state legislation or regulations. The agency must identify the business value of the change, any important deadlines that must be met, and the consequences if the deadlines are not met. In your discussion, be sure to note whether the proposed enhancements are funded or not. If the agency's existing current IT investments will not need enhancement due to requirements or mandates from external sources in the foreseeable future, the agency should enter the following text rather than leave the Factors Impacting the Current IT section blank

For each mandated change, summarize your agency's response from your Agency Strategic Plan, and is it the opinion of agency IT leadership that the IT portion of the response is adequately funded?

Do the mandated changes effect IT in other Commonwealth agencies, or in other states? If so, how?

Our business environment is constantly changing due to the increasing Veteran population who depend on services and assistance from our agency. In order to effectively serve our Veterans we need to move off of older technology and leverage new and more efficient technologies, while maintaining the ability to stay within budget. We are currently working with VITA/NG and other technology vendors to discover and utilize new and more efficient technologies to enhance our IT service operations.

Proposed IT Solutions

In this section, describe the high-level strategy the agency will use to initiate new IT investments over the next year to 5 years in support of the agency strategic objectives documented in your Agency Strategic Plan. The agency does not need to consider specific technologies at this time, however, the strategy should identify how the IT implementation will provide business value to the organization. This section should align with identified Business Requirements for New Technology (BRnTs). At minimum, please address the following questions in your description of your agency's strategy for initiating new IT investments:

What are the most important solutions, based on the priority assigned to the requirements by the business sponsors in your agency, and what is the approach to achieving these priority solutions?

If any new IT initiatives will be started in the upcoming budget biennium, is it the opinion of agency IT leadership that it is adequately funded?

Does the agency's current IT staff have the appropriate skill set needed to support future agency technologies? If not, what skill sets need to be acquired?

If the agency will be engaged in multiple new IT initiatives, how will agency IT staff and agency subject matter experts be used across the initiatives?

We currently are implementing new and more efficient technologies by working with VITA/NG and other technology vendors. Our current IT staff is small but agile and has several skill sets to assist with implementing and maintaining newer technology systems, but still relies on COV vendors and resources to supplement when necessary. Our agency has prioritized implementing IT solutions that will enhance the services provided to our Veterans directly and/or by the staff that provide these services.

1. Do you plan to use the IT Shared Security Service - No.
2. Do you plan to increase your internet use - Possibly.
3. Do you plan to use cloud hosting - Yes.
4. What are your plans for IT Infrastructure transition:
 - a. Identify your new projects/work, due dates and if it is mandatory - WR pending for our agency HQ move in Oct. 2016.
 - b. Identify your existing projects, due dates and if it is mandatory - No existing IT projects.
 - c. Identify your existing applications and infrastructure, where are the databases for your applications, do the applications have connections with other apps/databases: (see below)
 1. eVeterin - database at CESC. No connection with other apps/databases.
 2. Benevets - database is cloud hosted (exception on file with VITA). No connection with other apps/databases.
 3. Point Click Care - database is cloud hosted (exception on file with VITA). No connection with other apps/databases.
 4. Kronos - database is cloud hosted (exception on file with VITA). No connection with other apps/databases.
 5. VMSDEP - database is hosted with AISN. No connection with other apps/databases.
 6. DMS 3.0 - database is cloud hosted by another state entity (VA Tech). No connection with other apps/databases.

For Security:

Agencies should respond with one of the following statements:

The Department of Veterans Services has internal IT/Security staff to perform security and audit functions.

Report Title: Business Requirements For Technology

Agency: Department of Veteran Services (DVS)

Date: 4/17/2017

DVS IT Sourcing BReT

BRT Type: Business Requirement for Existing Technology

Date Submitted: 9/16/2016

Mandate:

Mission Critical:

Description:

Messaging BReT:

VITA is initiating disentanglement from NG messaging services in 2016. Messaging Services for email, enterprise collaboration services, and mobile device management are required for 800 users in our agency. We also have 0 applications that have hooks into messaging services which will need to be tested. Workplace Collaboration Services (VITA provided SharePoint) DVS uses WCS SharePoint. We have 0 applications serviced via AirWatch which will need remediation.

IBM Mainframe BReT:

VITA is initiating disentanglement from NG IBM Mainframe services in 2016. DVS has 0 applications on the IBM which will need to be migrated and tested during this transition.

Server/storage (including housing of equipment) BReT:

VITA is initiating disentanglement from NG servers and storage. DVS has 7 servers which will need to be migrated and tested during this transition and 2 applications (eVeterin and FMS) will be affected by this move and will need to be tested.

Authentication/directory services BReT:

DVS has 2 applications (eVeterin and FMS) which will need to be migrated and tested during the authentication/directory services transition. Number of users 850 are internal and 0 external.

End user computing BReT :

DVS has 185 desktops and 220 laptops and 36 network printers which will need to be migrated.

Data networks BReT :

DVS has no (0) networks that are not MPLS which will need to be migrated.

Voice Networks BReT:

DVS has approximately 300 UCaaS phone lines and 100 other phone lines which MAY need to be migrated.

Cloud Computing BReT:

DVS is investigating moving 3 applications to a Cloud services vendor. The business reason for the move is to reduce costs; increase efficiencies; reduce IT agency footprint; etc. Applications are cloud ready. Agency may need to bring in outside consulting to assess what needs to be done to the applications and supporting infrastructure in order to become clo

Report Title: Appendix A 16 - 18 Report

Agency: Department of Veteran Services (DVS)

Date: 4/17/2017

Agency Head Approval:

No

There are no Category 1, 2, or 3 IT Projects and no Budget Category: Major IT Projects for this agency.

Report Title: Appendix A 16 - 18 Report

Agency: Department of Veteran Services (DVS)

Date: 4/17/2017

Agency Head Approval:

No

There are no major procurements for this agency.
