

# Report Title: 2020 - 2022 IT Strategic Plan

Agency: 942 Virginia Museum of Natural History (VMNH)

Date: 8/7/2020

## Current Operational IT Investments

**In this section, describe the high-level strategy the agency will use to manage existing operational IT investments over the next year to 5 years. This section should align with identified Business Requirements for Existing Technology (BReTs). At minimum, please address the following questions in your description of your agency's strategy for managing existing operational IT investments:**

**Are there existing IT investments that will require additional funding over the next year to 5 years, such as license renewals, re-competition of current IT contracts, or system enhancements required by the Agency Strategic Plan?**

**If there are systems that will no longer support the agency's business needs, either through poor performance or excessive cost, how does IT leadership in the agency plan to address the issues?**

**If the agency does not have the staff or funding to meet increasing demand for IT services, how will IT leadership fulfill the requests?**

The Virginia Museum of Natural History (VMNH) is a 87,000 SF facility located in Southwest Virginia responsible for preserving and protecting Virginia's natural history. VMNH houses more than 10 million specimens and artifacts serving as the Commonwealth's centralized repository for natural history collections and continues to grow with the work of the scientists. VMNH was built to fill a gap in service to document our culture and natural heritage as well as coordinate an efficient network in Virginia where researchers and the public can readily use the natural history material of VMNH, its affiliates, Virginia's institutions of higher education and other museums to fulfill our "Museum without Walls" approach. To date, VMNH remains the state's only collections-based science institution, and excels in collections-based research, inquiry based science education, science teacher professional development, and exhibit experiences rich with the actual specimens and artifacts documenting the natural and cultural heritage of Virginia. They support the work of researchers worldwide who benefit from these collections. VMNH's scientists contribute regularly to the published literature of biology, geology, paleontology, and archaeology. To make these collections available, VMNH uses the collections database Re:discovery. This database requires yearly license and support fees that are currently unfunded. VMNH's education department utilizes its Distance Learning Adventure Classroom to provide significant SOL-based experiences for children, professional development, and educational training for numerous teachers across the Commonwealth and beyond.

VMNH uses all services from VITA for personal computing, network infrastructure, messaging, telecommunication as well as Centralized Information Security Officer (ISO) Service and IT Security Audit Service.

Other critical technology investments include:

- Physical security of the facility:
  - o Digital Watchdog Spectrum IP cameras
  - o Aura badging system doors access
- HVAC is monitored and controlled by:
  - o Alerton Ascent Compass system to monitor heating, cooling and humidity
  - o Building Sentinel to analyze and track energy usage and operating diagnosis
- Audio Visual and exhibit technology to provide visitors with an explanation of Virginia's natural history
- WeatherBug provided by Earth Networks for weather instrumentation and camera to provide readings to the local

weather forecasters

### **Factors Impacting the Current IT**

**In this section, the agency will describe the changes in their business environment that will require or mandate changes to the agency's current IT investments. These are requirements and mandates from external sources, such as other agencies or business partners, the agency's customer base, product and service providers, or new federal or state legislation or regulations. The agency must identify the business value of the change, any important deadlines that must be met, and the consequences if the deadlines are not met. In your discussion, be sure to note whether the proposed enhancements are funded or not. If the agency's existing current IT investments will not need enhancement due to requirements or mandates from external sources in the foreseeable future, the agency should enter the following text rather than leave the Factors Impacting the Current IT section blank**

**For each mandated change, summarize your agency's response from your Agency Strategic Plan, and is it the opinion of agency IT leadership that the IT portion of the response is adequately funded?**

**Do the mandated changes affect IT in other Commonwealth agencies, or in other states? If so, how?**

VMNH has been using a virtual server for several years, which meets the EO19 requirements.

The Re:discovery software is built upon Visual FoxPro which had an end of life of January 13, 2015 and for this reason, needs to be upgraded to the latest version known as Proficio which is built on SQL.

UCaaS phone system is not compatible with our network Verizon's VCE solution is being looked at as a replacement during this biennium.

Due to the excessive cost and slow speed of a T1 line for the MPLS network, VMNH contracted Comcast Business to provide a broadband backbone for our ERCS (Enterprise Remote Connectivity Service) network for a more robust network at a 900% yearly cost savings and meets VMNH's needs. Currently, this is unfunded.

Video streaming on the state networks causes bandwidth issues, so the local city government provides a fiber internet access. This provides the WIFI connection for distance learning, interactive exhibits, the education rooms and lecture halls, the HVAC and security camera systems (for monitoring and adjusting remotely) as well as providing internet for the public during their visits. This separate network keeps the usage and any security issues isolated from the state network. Currently, this is unfunded.

### **Proposed IT Solutions**

**In this section, describe the high-level strategy the agency will use to initiate new IT investments over the next year to 5 years in support of the agency strategic objectives documented in your Agency Strategic Plan. The agency does not need to consider specific technologies at this time, however, the strategy should identify how the IT implementation will provide business value to the organization. This section should align with identified Business Requirements for New Technology (BRnTs). At minimum, please address the following questions in your description of your agency's strategy for initiating new IT investments:**

**What are the most important solutions, based on the priority assigned to the requirements by the business sponsors in your agency, and what is the approach to achieving these priority solutions?**

**If any new IT initiatives will be started in the upcoming budget biennium, is it the opinion of agency IT leadership that it is adequately funded?**

**Does the agency's current IT staff have the appropriate skill set needed to support future agency technologies? If not, what skill sets need to be acquired?**

**If the agency will be engaged in multiple new IT initiatives, how will agency IT staff and agency subject matter experts be used across the initiatives?**

VMNH has purchased Proficio, the upgraded version of our database Re:discovery, and the vendor is still working on the

conversion to put it into the testing phase.

VMNH will maintain the license and support fees for the applications and the Centralized Information Security Officer (ISO) Service and IT Security Audit Service.

VMNH's aging phone system requires upgrading. Researching found that the infrastructure hardware is no longer available and if a part fails, there are no replacements. By the Museum using an ERCS network, the standard use of a UCCaaS phone system is not feasible, thus Verizon's VCE solution is being looked at as a replacement.

# Report Title: Business Requirements For Technology

Agency: 942 Virginia Museum of Natural History (VMNH)

Date: 8/7/2020

## BReT Broadband Internet for ERCS

<b>BRT Type:</b>	Business Requirement for Existing Technology
<b>Date Submitted:</b>	8/7/2020
<b>Mandate:</b>	No
<b>Mission Critical:</b>	Yes

### Description:

Monthly fee to ISP for broadband internet service for the Commonwealth of Virginia's ERCS network at \$144.85

## BReT Re:discovery Upgrade

<b>BRT Type:</b>	Business Requirement for Existing Technology
<b>Date Submitted:</b>	8/7/2020
<b>Mandate:</b>	Yes
<b>Mission Critical:</b>	Yes

### Description:

Update the application from Re:discovery to the current version Proficio

## BRet VMNH Phone System

<b>BRT Type:</b>	Business Requirement for Existing Technology
<b>Date Submitted:</b>	8/7/2020
<b>Mandate:</b>	No
<b>Mission Critical:</b>	Yes

### Description:

Update our current system that is no longer made and needs to be upgraded

## Compliance with Commonwealth Security BReT

<b>BRT Type:</b>	Business Requirement for Existing Technology
<b>Date Submitted:</b>	8/7/2020
<b>Mandate:</b>	Yes
<b>Mission Critical:</b>	No

### Description:

VMNH is in the process of signing two MOUs for auditing external sensitive systems.

# Report Title: IT Strategic Plan Budget Tables
