**Option 1**

- BARR Enterprise Print Server (BEPS)
  - Barr’s Windows-based print spooler with connections to many sources of print data and many printers.
- IBM Mainframe – z/OS z9 2094-407
- BARR Encryption
  - Barr’s Windows-based print spooler with connections to many sources of print data and many printers.
- Printer
- Courier Delivery
- Agencies

**Option 2**

- Hire two (2) contractors.
- BARR Enterprise Print Server (BEPS)
  - Barr’s Windows-based print spooler with connections to many sources of print data and many printers.
- IBM Mainframe – z/OS z9 2094-407
- Prisma Server
  - Print Formatting
- Printer

10 mainframe printing customers including DMV of which DSS is the only agency with sensitive Federal Tax Information (FTI) data.
PURPOSE: This Fit-for-Purpose Logical view is to identify the pieces and parts of the current (As-Is) mainframe printing.

POC = Mike Shaffer  http://www.barrcentral.com/

Primary mainframe users
(30% + utilization): DMV, DSS, and VEC. Other agencies access the mainframe.

Agencies Using CESC Printing

Agencies Spooling Their Own Printing
