Microsoft	Exchange	2025		Emerging		Projected 9/1/2025						<p>https://techcommunity.microsoft.com/t5/exchange-team-blog/exchange-server-roadmap-update/ba-p/3421389</p> <p>https://www.zdnet.com/article/microsoft-next-version-of-exchange-server-not-until-2025/</p>	<p>EA Direction is move to software as a service (SaaS) solutions - in this case Exchange Online. For many organizations, Exchange Online in Microsoft 365 delivers the best productivity, the best security and compliance features and is the most cost-effective solution and best experience. If you are an Exchange Server customer that wants to move to Exchange Online, contact your Microsoft account team today to take advantage of available offers, get help from FastTrack, and receive end-to-end guidance from Microsoft. https://www.microsoft.com/en-us/microsoft-365/exchange/email?rtc=1</p> <p>We have moved the release date for the next version of Exchange Server to the second half of 2025. The next version will require Server and CAL licenses and will be accessible only to customers with Software Assurance, similar to the SharePoint Server and Project Server Subscription Editions. We will provide more details on naming, features, requirements, and pricing in the first half of 2024. https://techcommunity.microsoft.com/t5/exchange-team-blog/exchange-server-roadmap-update/ba-p/3421389</p> <p>We are moving the next version of Exchange Server to our Modern Lifecycle Policy, which has no end of support dates. We plan on continuing to support Exchange Server as long as there is substantive market demand. https://techcommunity.microsoft.com/t5/exchange-team-blog/exchange-server-roadmap-update/ba-p/3421389</p> <p>For migrations from an existing on-premises Exchange Server environment, you can migrate all email, calendar items, tasks and contacts from user mailboxes to Office 365. The available methods are cutover, staged, and Exchange Hybrid migrations. These migration methods copy over all mail data, including contacts, calendar items, and tasks. You can also use the Internet Message Access Protocol (IMAP) migration from Exchange servers. https://learn.microsoft.com/en-us/exchange/mailbox-migration/decide-on-a-migration-path</p>
		2019 Enterprise and Standard		Approved	N	10/22/2018	10/22/2019	11/1/2024	5/1/2025	10/14/2025	10/14/2025	<p>https://learn.microsoft.com/en-us/lifecycle/products/exchange-server-2019</p> <p>https://support.microsoft.com/en-us/lifecycle/search/730</p>	<p>Exchange Server 2019 Support Dates applies to Enterprise and Standard. Exchange Server 2019 follows the Fixed Lifecycle Policy. https://learn.microsoft.com/en-us/lifecycle/products/exchange-server-2019</p> <p>Date Logic: N/A - EA direction is to move to SaaS.</p> <p>Note the end date for 2019 does not match the next version of Exchange Server being released in the second half of 2025 so we will have to monitor the change in what surely must be an updated extended end-of-support date - most likely this change will be made by the end of 2024.</p> <p>Version history site: https://endoflife.date/</p>
		2016 Enterprise		Divest: Plan	N-1	10/1/2015		11/1/2022	11/1/2023	11/1/2024	10/14/2025	<p>https://en.wikipedia.org/wiki/Microsoft_Exchange_Server</p>	<p>Exchange Server 2016 Support Dates applies to Enterprise and Standard. Exchange Server 2016 follows the Fixed Lifecycle Policy. https://learn.microsoft.com/en-us/lifecycle/products/exchange-server-2016</p> <p>Runs exclusively on Windows Server operating systems. Extended support end date is 10/14/2025. Mainstream support end date is 10/13/2020. If you can't move your mailboxes to the cloud and you plan on keeping mailboxes on-premises, then you really should be moving to Exchange Server 2019, and using that for both mailboxes and hybrid connectivity. That way you get full support including non-critical bug fixes and get ongoing product improvements. https://techcommunity.microsoft.com/t5/exchange-team-blog/exchange-server-2016-and-the-end-of-mainstream-support/ba-p/1574110</p>
		2013 Enterprise		Prohibited							4/11/2023		<p>On April 11, 2023, less than 90 days from today (Jan 12 2023), Exchange Server 2013 reaches End of Support! After that date, Microsoft will no longer provide: 1) Technical support for problems that may occur; 2) Bug fixes for issues that are discovered and that may impact the stability and usability of the server; 3) Security fixes for vulnerabilities that are discovered and that may make the server vulnerable to security breaches; 4) Time zone updates. Exchange Server 2013 will continue to run after this date, of course; however, due to the risks listed above, we strongly recommend that you migrate from Exchange Server 2013 as soon as possible. If you haven't started your migration from Exchange Server 2013 to Exchange Online or Exchange Server 2019, get going now! In order to stay supported you can: 1) Upgrade to Exchange Server 2019 and/or 2) Migrate to Exchange Online. https://techcommunity.microsoft.com/t5/exchange-team-blog/exchange-server-2013-end-of-support-coming-soon/ba-p/3714799</p>

Follow Microsoft 365 guidance for SharePoint as applicable. https://www.microsoft.com/en-us/microsoft-365/enterprise</p> <p>Date Logic: N/A</p> <p>SharePoint Server is provided to organizations that seek greater control over SharePoint's behavior or design. This product is installed on customers' IT infrastructure. It receives fewer frequent updates, but has access to a wider set of features and customization capabilities. There are currently two editions of SharePoint Server: Standard and Enterprise. These servers may be provisioned as normal virtual/cloud servers or as hosted services. https://www.computersupport.com/itanywhere/labs/sharepoint-online-on-premises-2019-version-review/ https://docs.microsoft.com/en-us/officeupdates/sharepoint-updates</p> <p>SharePoint Server Subscription Edition (SE) https://redmondmag.com/articles/2021/07/20/sharepoint-server-subscription-edition-preview.aspx https://techcommunity.microsoft.com/t5/microsoft-sharepoint-blog/a-new-day-for-sharepoint-server/ba-p/2556404 What is the difference between Office 365 and Microsoft 365? Microsoft 365 includes everything you know in Office 365. Microsoft 365 is designed to help people and businesses achieve more with innovative Office apps, intelligent cloud services, and world-class security. https://www.microsoft.com/en-us/microsoft-365/office-365 In a statement to Office 365 users and reported by Mary Jo Foley in ZDNet, Microsoft stated: "In mid-September, the Office 365 Roadmap will become the Microsoft 365 Roadmap and will move to a new web location. In addition to retaining all the current information and functionality of the existing Office 365 Roadmap, the new site will include Microsoft 365 product features from Windows 10, Enterprise Mobility Suite, and Azure."
