Given the large impact of an ERP software migration, recommend planning well in advance for migration from legacy PeopleSoft to most likely Oracle's ERP cloud. Because cloud updates are every 90days by Oracle, usage in the cloud means you get these updates automatically and do not have to conduct them yourselves, thereby negating the need for tracking of N and N-1 updates. See https://www.oracle.com/erp/move-peoplesoft-to-cloud/ which mentions: "A modern cloud solution that stays current with quarterly updates delivered automatically."</p>

The SharePoint Framework, released in February 2017, is a key tool to achieve this. Microsoft Teams is the vendor's attempt to forge a new cloud collaboration model that uses SharePoint Online as a content services utility for sites, pages, news, lists and libraries. Traditional document-centered and email-enabled collaboration models — such as used by classic SharePoint Server — lack the flexibility and communications options found in the growing array of more modern but disparate tools. Hybrid deployments: Among Gartner clients, hybrid deployments — combining SharePoint Server and SharePoint Online — are not prevalent. These deployments in any case add more complexity to large-scale, on-premises SharePoint installations. Microsoft's goal is to lock customers into Office 365 as soon as possible.
