Notes
Dataverse lets you securely store and manage data that's used by business applications. Data within Dataverse is stored within a set of tables. A table is a set of rows (formerly referred to as records) and columns (formerly referred to as fields/attributes). Each column in the table is designed to store a certain type of data, for example, name, age, salary, and so on. Dataverse includes a base set of standard tables that cover typical scenarios, but you can also create custom tables specific to your organization and populate them with data by using Power Query. App makers can then use Power Apps to build rich applications that use this data. <a href="https://learn.microsoft.com/en-us/power-apps/maker/data-platform/data-platform-intro">https://learn.microsoft.com/en-us/power-apps/maker/data-platform/data-platform-intro</a>
EA Direction is to continue upgrading to the newest long-term release. Up to and including SQL Server 2016, RTM and any subsequent SPs establish a new product baseline. For each new baseline, CUs are provided for roughly 12 months after the next SP releases, or at the end of the mainstream phase of product lifecycle, whichever comes first. For the entire product lifecycle, Microsoft releases General Distribution Releases (GDRs) when needed, containing only security related fixes.  Release pattern: 2 years
Versioning does not apply, as this is Database as a Service (DBaaS)

DB2 for z/OS versions 11.1 (3/31/2021) and 10.1 (9/30/2017) have been withdrawn for support.
11.1: End of Support 4/30/22; extended support thru 4/30/22. 11.5 EOS date not provided, minimum 3 years after EOS
Innovation Release - NOT RECOMMENDED Error Correction / Patching is available until June 30, 2023; 21c is not eligible for Extended Support (ES).
There are two types of Oracle Database releases: <b>Long Term Release and Innovation Release. Long Term Release:</b> Oracle Database Long Term Releases are ideal for use cases that benefit from less frequent upgrades to newer releases. Long Term Releases offer the highest level of stability and the longest length of error correction support. These releases have 5 years of Premier Support followed by 3 years of Extended Support. When combined with Extended Support, customers typically have almost 4 years to upgrade from one Long Term Release to the next Long Term Release. <b>Innovation Release:</b> In between Oracle Database Long Term Releases, Oracle delivers Oracle Database Innovation Releases that include many enhancements and new capabilities which will also be included in the next Long Term Release. Innovation Releases are designed to enable customers to continuously use leading-edge technologies to rapidly develop or deploy new applications or augment existing applications. Support for Innovation Releases includes at least 2 years of Premier Support, but there is no Extended Support. Production workloads can be deployed on Innovation Releases if upgrading to the next database release within one year after the next database release ships is factored into the deployment plan.

<p>Release pattern: 3 months</p> <p>No release date for is available for mySQL 9.0</p> <p>Oracle lifetime support does not provide security patching and has 3 options: <b>MySQL Premier Support</b></p> <p>- 5 years, starting at GA, of Premier Support that includes MySQL maintenance releases, updates, fixes (error correction), and security alerts.</p> <p><b>MySQL Extended Support</b> - 3 years of extra support including error correction, beyond the Premier Support period, for specific MySQL releases.</p> <p>Includes MySQL maintenance releases, updates, bug fixes (error correction), and security alerts.</p> <p><b>MySQL Sustaining Support</b> - Any time, beyond the Premier Support period. Support only. No new releases, no new fixes (no error correction for new issues), no new updates. Only pre-existing updates, fixes and alerts are available.</p>
<p>Apache Airflow is an open-source workflow management platform for data engineering pipelines. support continues for approximately 3 years after release which was GA in December 2020</p>
<p>current version is 6.2; patches are released monthly</p>

<p><b>EA Direction</b> is to continue upgrading to the newest long-term release.</p> <p><a href="https://enterprise.arcgis.com/en/web-appbuilder/latest/create-apps/about-versions.htm">https://enterprise.arcgis.com/en/web-appbuilder/latest/create-apps/about-versions.htm</a></p>
<p>ArcGIS Enterprise 10.9.1 on Windows and Linux is a long-term support release.</p> <p><a href="https://support.esri.com/en/Products/Enterprise/arcgis-server/ArcGIS-Server/10-7#product-support">https://support.esri.com/en/Products/Enterprise/arcgis-server/ArcGIS-Server/10-7#product-support</a></p>
<p>ArcGIS Enterprise 10.8.1 is a long-term support release.</p> <p>NOTE: Beginning with ArcGIS Enterprise 10.7, versions of ArcGIS Enterprise will either be designated as short-term support releases or long-term support releases. Long-term support releases will receive a total of 6 years of support.</p> <p><a href="https://support.esri.com/en/Products/Enterprise/arcgis-server/ArcGIS-Server/10-8-1#product-support">https://support.esri.com/en/Products/Enterprise/arcgis-server/ArcGIS-Server/10-8-1#product-support</a></p>
<p>10.8 is a short term release.</p>
<p>ArcGIS Enterprise 10.7.1 will be a long-term support release.</p> <p>A long-term support release mirrors the product lifecycle as it has been defined since ArcGIS 10.2, which includes a total of 6 years of support</p>
<p>ArcGIS Enterprise 10.7 is a short-term support release.</p>
<p><b>EA Direction</b> is to continue upgrading to the newest release.</p> <p><a href="https://www.businessintelligencesoftware.co/sap-businessobjects-bi-4-4.html">https://www.businessintelligencesoftware.co/sap-businessobjects-bi-4-4.html</a> Information on this site indicates that "<i>...SAP Business Objects BI 4.4 is due to be released in Q1 2022 according to inside sources at SAP.</i>"</p>

<p>Product availability matrix is behind another type of login other than the initial one so unable to obtain via SAP's website. You are signed in with a P-user ID. Visitors with an S-user ID will benefit from more tools and enhanced functionality. If you are an SAP customer, contact a user administrator in your company to request such an ID. Your SAP Local Support Center can help you identify your administrators. If you already own an S-user ID, log out now and log in with your S-user ID.</p> <p><a href="https://launchpad.support.sap.com/assets/shell/public-user.htm">https://launchpad.support.sap.com/assets/shell/public-user.htm</a></p> <p><a href="https://apps.support.sap.com/sap/support/pam">https://apps.support.sap.com/sap/support/pam</a> - requires credentials to access.</p> <p>When access using credentials then says not authorized to view this resource and that I need another login.</p> <p><a href="https://support.sap.com/release-upgrade-maintenance/release-strategy/release/on-premise/rules.html">https://support.sap.com/release-upgrade-maintenance/release-strategy/release/on-premise/rules.html</a></p>
<p>Product Availability Matrix: The Product Availability Matrix (PAM) is where you can find details about SAP software product versions, including availability and end of maintenance dates, upgrade paths, and technical release information (database platforms, Java platforms, operating systems, etc.). Mainstream support is 7 years; two years of additional priority-one support. Requires a login credential I don't seem to have as of September-2020 and is unnecessarily difficult to access for a product sold to the public.</p> <p><a href="https://blogs.sap.com/2018/07/30/sap-businessobjects-business-intelligence-suite-4.2-sp06-sp6-released/">https://blogs.sap.com/2018/07/30/sap-businessobjects-business-intelligence-suite-4.2-sp06-sp6-released/</a></p> <p><a href="https://www.sap.com/products/roadmaps.html">https://www.sap.com/products/roadmaps.html</a></p> <p><a href="https://en.wikipedia.org/wiki/BusinessObjects">https://en.wikipedia.org/wiki/BusinessObjects</a></p> <p><a href="https://www.businessintelligencesoftware.co/sap-business-objects-versions.html">https://www.businessintelligencesoftware.co/sap-business-objects-versions.html</a></p>
<p><b>EA Direction</b> is to continue upgrading to the newest release.</p>

<p><b>As of January 1, 2020</b>, SAS has moved to the following, two-level support policy that is based on the General Availability date for a product:</p> <p><u>Standard Support</u>: This support level is based on a product's General Availability release date, and it has a time limit of five years from that date.</p> <p><u>Limited Support</u>: This support level is provided for products that move outside of the five-year Standard Support time frame. Limited Support lasts until the product is retired, and it includes self-help resources only for previously identified issues.</p> <p><a href="https://support.sas.com/en/technical-support/services-policies.html#non-current">https://support.sas.com/en/technical-support/services-policies.html#non-current</a></p>
<p>SAS 9 and <b>SAS Viya</b> are two unique platforms <b>built for different use cases</b>. Because of the advancement in technology and infrastructure since SAS 9 was released, the technology of SAS Viya is very different from SAS 9. SAS Viya is an open, unified, and powerful platform, ready for native Cloud deployment. Cloud Analytic Services (CAS) In-Memory Engine: This engine is the power behind SAS Viya. In SAS Viya, the SAS High-Performance Architecture and SAS LASR Analytic Server from SAS 9 combine to form a third-generation high-performance analytics engine.</p> <p><a href="https://www.sas.com/content/dam/SAS/support/en/sas-global-forum-proceedings/2019/3503-2019.pdf">https://www.sas.com/content/dam/SAS/support/en/sas-global-forum-proceedings/2019/3503-2019.pdf</a></p> <p><a href="https://www.sas.com/content/dam/SAS/support/en/technical-papers/sas9-4-sas-viya-functional-comparison.pdf">https://www.sas.com/content/dam/SAS/support/en/technical-papers/sas9-4-sas-viya-functional-comparison.pdf</a></p>
<p>SAS new Standard support is 5 years from GA date. There is a 1 year grace period for 9.2 (starting 1/2020). There is a 3 year grace period for 9.3. 9.4 versions have a 5 year grace period.</p> <p>Note: Only m3 and higher is supported on Windows 10.</p> <p><a href="https://support.sas.com/en/technical-support/services-policies.html#non-current">https://support.sas.com/en/technical-support/services-policies.html#non-current</a></p>
<p><b>EA Direction</b> is to continue upgrading to the newest release.</p>

IBM has aggressively moved many of the products in their software portfolio to Enhanced ‘5+3’ support – a minimum of five full years of standard support from the date the product release was made generally available by IBM, with the option to get support extensions for at least an additional three years following a product’s EOS date for an extra charge set by IBM. Current pattern for SPSS is 5 to 6 years of support.
IBM Software Lifecycle: Download a full copy of the IBM Software Lifecycle product list in CSV format.  <a href="https://www.ibm.com/support/pages/software-lifecycle-product-list">https://www.ibm.com/support/pages/software-lifecycle-product-list</a>
Each minor version of these Products is Supported for twenty-four (24) months from the release of that minor version.
The most current version is Approved version; releases occur every month
es
Allow 6 months for Prohibited; Divest Plabn and Divest Execution; Allow 6 month for Emerging to approved
Requires additional research
Blackbaud ended Support on 12/15/2021
web-based analytics tool; includes App + Web properties
