		7.x	8.0		Skipped		5/7/2019								https://access.redhat.com/support/policy/updates/errata/	There are currently two supported branches for RHEL (8.x and 7.x). We are expected one final release for the 7.x branch, projected for mid 2020. For Linux 8.x, Red Hat is following a 6 month minor release schedule. Extended Update Support does provided security patches. The initial full support is 6 months and the extended is an additional 18 months when available, 8.3; 8.5; and 8.7 are not scheduled to have extended support and these might be candidates for being skipped. Roadmap allows for 6 months between GA and COV availability
