

Enterprise Information Architecture (EIA) Scorecard Survey Summary

Joseph W. Grubbs, Ph.D.
Commonwealth Data Governance

Presentation to the
Health IT Standards Advisory Committee
October 18, 2012

Please indicate your level of agreement with the following statements within your Agency.

How involved are the following staff members in your Agency's EIA activities?

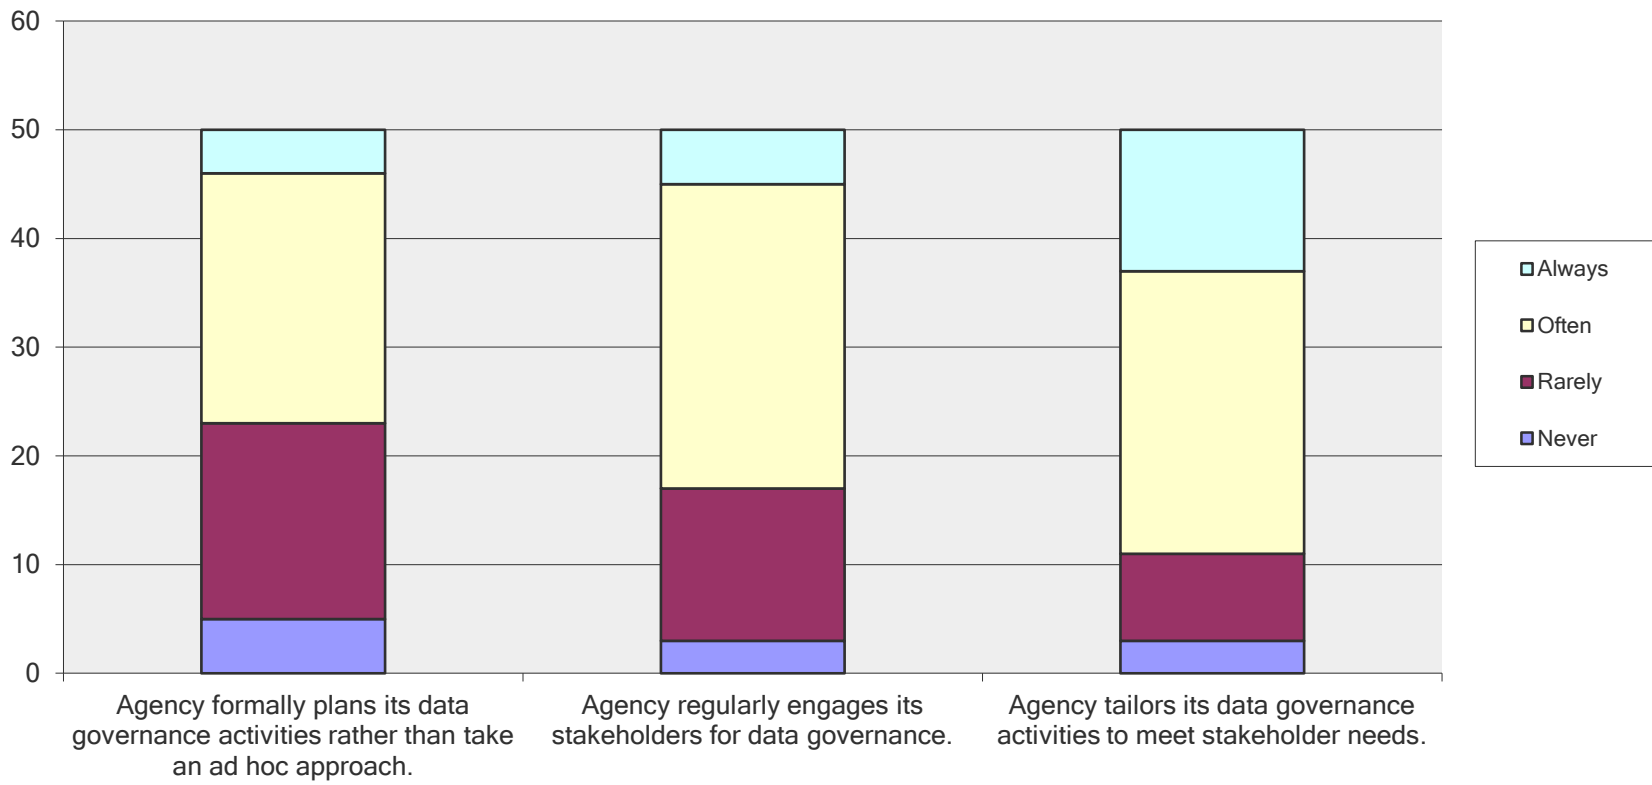

Which of the following EIA deliverables have been implemented by your Agency?

How organized and stakeholder-driven is your Agency's data governance program?

How frequently do the following data governance activities occur in your Agency?

How involved are the following staff members in your Agency's data governance activities?

Does your Agency maintain metadata - descriptive information about agency data - as part of its data management practice?

How well documented and tracked are your Agency's data assets?

Which of the following best describes your Agency's approach to maintaining metadata for enterprise data assets?

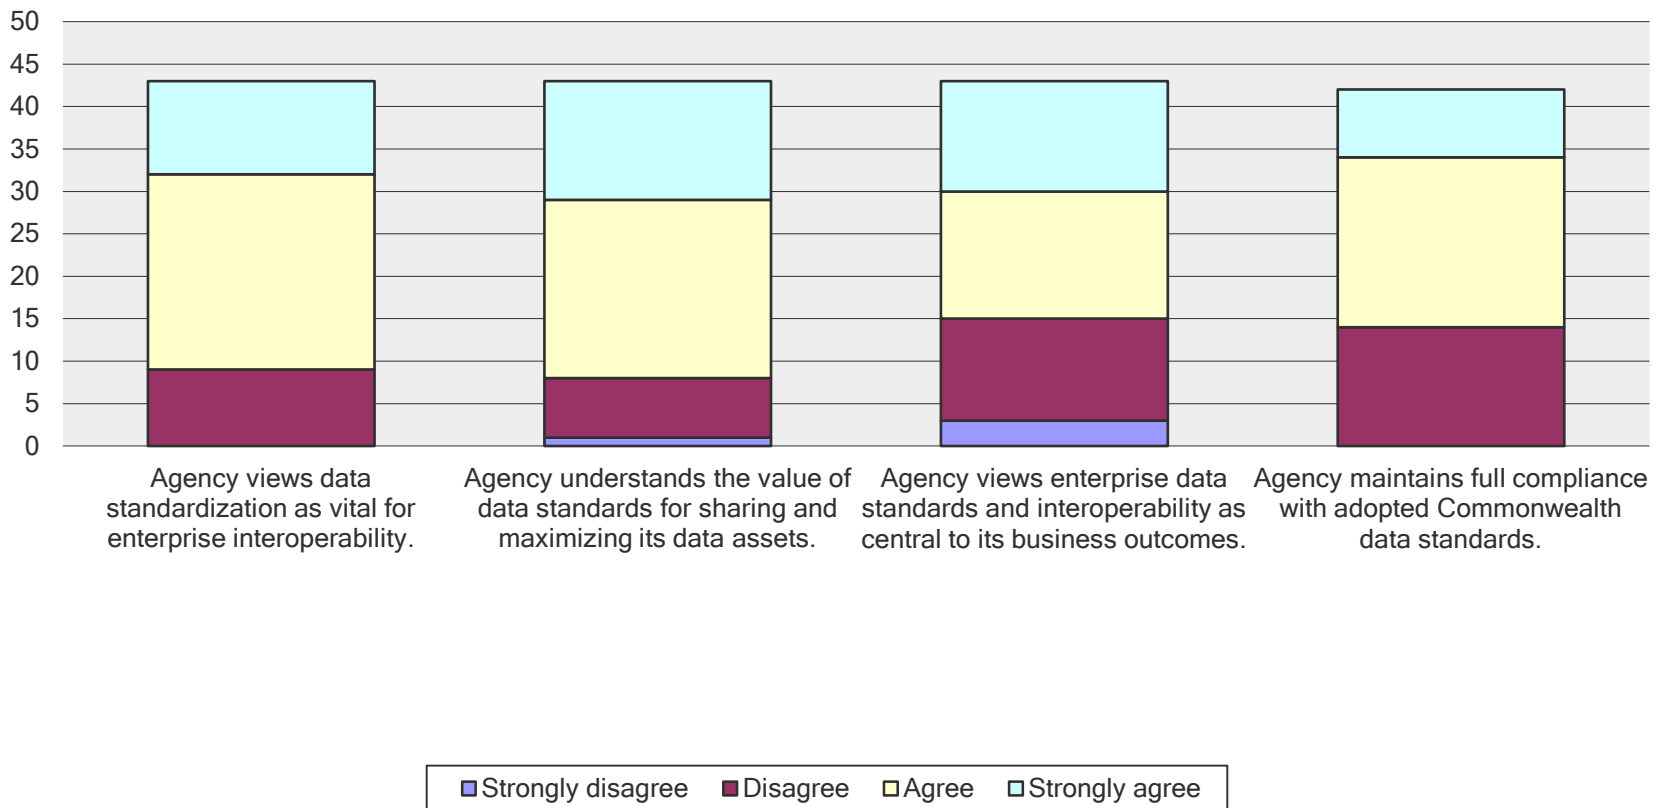

- Agency uses basic tools such as Microsoft Word, Excel or Access with general descriptive information on the data assets.

- Agency uses specialized tools such as OneMeta MDR or LogiXML with general descriptive information on the data assets.

- Agency uses specialized tools such as OneMeta MDR or LogiXML with standardized metadata information for all data assets.

How would you describe your Agency's view of data standardization?

Which of the following best describes your Agency's approach to data standards?

- Agency develops its data-management solutions without considering or identifying applicable data standards.

- Agency develops its data-management solutions based on "internal" standards designed for the Agency or each individual system.

- Agency develops its data-management solutions based on adopted Commonwealth data standards and/or standards maintained by national/international Standards Development Organizations (SDOs).

- Agency develops its data-management solutions based on adopted Commonwealth data standards and/or standards maintained by national/international Standards Development Organizations (SDOs) and regularly tracks these standards for new versions or updates.

How involved are the following staff members in your Agency's compliance monitoring for data standards?

During which of the following project or product phases does your Agency monitor compliance with adopted data standards?

How does your Agency view the Commonwealth EIA Program's process for data standards?

Does your Agency share data with other Agencies or external partners?

How would you describe your Agency's view of enterprise data sharing?

With what entities does your Agency share its enterprise data assets and through what type of agreement?

What would you consider to be your Agency's biggest barriers to enterprise data sharing?

How would you rank the following Agency staff members as drivers of enterprise data sharing?
