

Service Category	Service Name	Short description
Account Management	Contact Record Request	Use this form when you need to create a contact record for external users for the purpose of being added to a distribution list (DL).
Account Management	Folder/Share Access Request	Use this form when requesting the ability to create, modify or remove a folder or share.
Account Management	KSE Assignment Group/Queue Request	Use this form to create, modify, or disable an assignment group or queue in Keystone Edge.
Account Management	SARA Request	SARA Request - VDOT Users Only
Account Management	Service Account Request	Use this form when requesting to create, modify or disable a service account.
Account Management	SWAP Account Request	This is a request to create a Secure Web Application Portal (SWAP) Account.
Application Integration Services	AIS Application Server	The AIS Application Server (AIS-APPSVR) service offers agencies an application server platform for hosting agency applications.
Application Integration Services	AIS Database	The AIS Database (AIS-DB) service is currently only offered to support other AIS Services.
Application Integration Services	Business Rules Management	The Business Rules Management (BRM) service offers agencies a robust system for managing and accessing business logic.
Application Integration Services	Enterprise Service Bus	The Enterprise Service Bus (ESB) service enables agencies to simplify, expedite, and streamline their application integration.
Application Integration Services	Mailing Address Verification	The Mailing Address Verification (MAV) service is a real-time address verification service. Agencies subscribed to MAV can utilize real-time address lookups in agency applications.
Application Integration Services	VITA Oracle private cloud service	The VITA Oracle private cloud (VOPC) service provides a virtualized compute platform for Oracle workloads. The service is based on high-performance IBM Power9 systems that are deployed as an on-premise private cloud in the QTS datacenter. Customers are able to virtualize Oracle workloads into secure environments specifically configured for each customer. The VOPC includes capabilities to scale resources based on customer needs.

Service Category	Service Name	Short description
Application Integration Services	VITA secure gateway service	The VITA secure gateway (VSG) service provides security and integration for Commonwealth of Virginia (COV) websites, applications and services. VSG is based on the IBM DataPower® multi-channel gateways that deliver security, control, integration and optimized access to a full range of on-premise and cloud workloads.
Cloud Services	Amazon Web Services (AWS)	The cloud service is provided as a means to access computing services such as servers, networking, storage, database, deployment, developer tools and software. The hardware, operating system (OS), software, networking features chosen provide high availability, redundancy, security and service options. AWS must be implemented with Direct Connect.
Cloud Services	Cloud Service Assessment	Enterprise Cloud Oversight Service (ECOS) provides oversight functions and management of cloud based services, specifically focused on software as a service (SaaS). The service assures compliance and improved security by providing transparency through VITA oversight.
Cloud Services	Cloud Service Oversight (Monthly)	Enterprise Cloud Oversight Services (ECOS) Oversight
Cloud Services	Cloud Sourcing Specialist	Enterprise Cloud Oversight Services (ECOS) Supply Chain Management (SCM) Services
Cloud Services	Cloud Workload Optimization Service	Workload optimization allows an application or group of applications the ability to leverage the underlying hardware and infrastructure layers to achieve peak performance. Cloud optimization is the process of correctly assigning and selecting the proper resources for an application or workload.
Cloud Services	Microsoft Azure Infrastructure Service	The cloud service is provided as a means to access computing services such as servers, networking, storage, database, deployment, developer tools and software. The hardware, operating system (OS), software, networking features chosen provide high availability, redundancy, security and service options. Azure must be implemented with ExpressRoute.

Service Category	Service Name	Short description
Cloud Services	Oracle Cloud Infrastructure (OCI)	The cloud service is provided as a means to access computing services such as servers, networking, storage, database, deployment, developer tools and software. The hardware, operating system (OS), software, networking features chosen provide high availability, redundancy, security and service options. OCI must be implemented with Oracle FastConnect.
Cloud Services	Zoom for Government	Zoom for Government is a cloud-based video conferencing service that enables users to virtually meet with others either by video, audio-only or both.
Coming Soon	MacBook Air 2020 13in	COMING SOON - Traveling Professional - Premium Laptop Plus
Coming Soon	MacBook Pro 2021 14in	COMING SOON - Traveling Professional - Premium Laptop Plus
COV Account Updates	COV Security Group Request	Use this form to request new security groups or to make changes to an existing security group.
COV Account Updates	COV-AUTH Okta Application Integration	The single sign-on (SSO) and multifactor authentication (MFA) service allows authorized Commonwealth (COV) and AUTH domain users to seamlessly access agency web applications with the same account they use to log on to their work computer. Further, it gives the means to modify / adjust previously integrated applications or Okta organization changes if required.
COV Account Updates	Extend Existing COV Account	Use this form to extend or renew COV accounts.
COV Account Updates	Offboarding Employee/Contractor	Use this form to off-board an employee or contractor.
COV Account Updates	Okta Authentication	This form can be used to update user information related to Okta application access.
COV Account Updates	Onboarding Employee/Contractor	Use this form to onboard an employee or contractor.
COV Account Updates	Onboarding Employee/Contractor	Use this form to onboard an employee or contractor.
COV Account Updates	Re-Enable Existing COV Account	Use this form to re-enable COV accounts that are currently disabled.

Service Category	Service Name	Short description
COV Account Updates	Temporary Disable COV Account	Use this form to temporarily disable a COV account in active directory (AD).
COV Account Updates	Update Existing COV Account	Use this form to change account information.
COV Account Updates	Urgent Account Disable	Use this form for URGENT account disables.
DMV Only	DMV Request For Change	
Domain Name Services	DNS Entry\Update	This form can be used to create, remove or update domain name system (DNS) entries.
Mainframe Services	Access Coordinator Assignment Request	This form allows you to change your Mainframe Access Coordinator.
Mainframe Services	Logon ID Request (Form VITA 003-01) – IBM Mainframe	This form, also known as VITA form 03-001, is used to request a logon ID to obtain access to the VITA IBM mainframe.
Mainframe Services	Mainframe Account Billing Request	This form is used to request a new billing account for an agency user.
Mainframe Services	Mainframe Service Billing Contact Change	This form is used to request a change to the agency point of contact for mainframe service billing.
Mainframe Services	Mainframe Services User ID Account Number	Mainframe Services User ID Account Number
Messaging Services	Distribution list request	Use this form when you need to have a distribution list (DL) created, modified, or deleted
Messaging Services	Email and Data Encryption	Email and data encryption provides the Commonwealth agencies with end-to-end encryption of email messages and content via rights management and advanced controls.
Messaging Services	Email List Management	Email list management distributes messages to subscribers using an electronic mailing list. This service is good for newsletters, email groups, forums and blogs. Email list management enables agencies to interact with constituents and employees.
Messaging Services	Enterprise Handheld Service - Google Mobile Device Management (MDM)	Enterprise Handheld Services Mobile Device Management (MDM) provides users the capability to access email, calendar, and contacts within the COV environment securely from Android & iOS mobile devices, including tablets.
Messaging Services	Google Chat and Google Meet	Google Chat is an instant messaging application that enables users to send and receive direct and

Service Category	Service Name	Short description
		group instant messages in real time. Google Meet allows users to participate in teleconferencing and video sessions, with features such as screen sharing, meeting chat, image capture and more.
Messaging Services	Google Drive	Google Drive is a cloud storage service that allows document sharing within the COV domain.
Messaging Services	Google email platform	Google email platform provides a messaging platform that enables access to platform applications.
Messaging Services	Google Vault	Messaging archiving service is an enterprise-wide solution that allows any customer subscribed to Messaging Mailbox to archive all inbound and outbound emails.
Messaging Services	Mailbox Delegation Request	Use this request to add or remove delegates from a mailbox.
Messaging Services	Messaging services resource request	Use this form when you need a resource such as calendars.
Messaging Services	Microsoft 365 Email Platform	Microsoft 365 email platform are Microsoft licenses for Commonwealth of Virginia based platform applications providing best-in-class productivity apps combined with core security and compliance capabilities for your enterprise.
Messaging Services	Mobile Device Management (MDM)	Mobile device management (MDM) provides users the capability to use their personal or work devices to securely access and manage Commonwealth of Virginia (COV) applications on a mobile device. It allows the ability to configure and manage settings, deploy applications and provide up-to-date metrics on the state of a device.
Messaging Services	Request for Solution: Messaging Platform Migration	This form enables customers to request migration from the Google Workspace to Microsoft 365 messaging or from the Microsoft 365 messaging to Google Workspace.
Messaging Services	Shared Mailbox Request	Use this form when requesting to create, modify or remove a shared mailbox.
Messaging Services	Shared Mailbox Request	Use this form when requesting to create, modify or remove a shared mailbox.

Service Category	Service Name	Short description
Messaging Services	Vault for former employee (VFE) permanent deletion	Use this form to request permanent deletion for archived accounts.
Messaging Services	Workspace One for Mobile Device Management (MDM)	Workspace One (formally AirWatch) for mobile device management (MDM) enables eligible customers to securely access and manage Commonwealth of Virginia (COV) applications on a mobile device without the use of a public facing application store. The service allows the ability to configure and manage settings, deploy applications and provide up to date metrics on the state of a device. Workspace One can support a wide array of devices including Apple and Google based technologies. An agency application must be configured by its owner to leverage Workspace One.
Network Services	Digital customer experience (Digital CX)	Digital Customer Experience (Digital CX) is a cloud-based product suite that blends human and artificial intelligence to enhance an agency's customer engagement across multiple digital channels to reach their customers wherever the customer is located. The end-to-end solution set is designed to address an agency's needs for digital transformation using special features such as Virtual Agent, Live Agent, Knowledge Assist and Social Engagement.
Network Services	LiveNX access request	Service tower supplier (STS) and agency request for access to LiveNX network monitoring tool.
Network Services	Managed LAN	Managed LAN provides for the complete management of local area network switches including management, monitoring, configuration, trouble resolution and reporting.  Must be implemented with a managed WAN or managed router and secure gateway.
Network Services	Managed WAN (Change, Upgrade)	Managed WAN provides for the complete management of wide area networking with a router to include management, monitoring, configuration, trouble resolution and traffic reporting.

Service Category	Service Name	Short description
Network Services	Managed Wireless LAN	Managed WLAN provides for the complete management of wireless local area network equipment including management, monitoring, configuration, trouble resolution and reporting.  Must be implemented with a managed WAN or managed router and secure gateway.
Network Services	Network - MACD (Move, Add, Change, Disconnect)	Use this form to request a change or disconnect to an existing MWAN, MLAN, or MWLAN service.
Network Services	Secure Cloud Interconnect (SCI)	SCI provides an interconnection with the network of select third-party cloud providers enabling an agency to utilize those third-parties' cloud services over a private IP to the COV environment network. Once the first agency subscribes SCI, the service rises to an enterprise connection at CESC. The connection can grow as the commonwealth's usage grows.
Network Services	Secure Gateway Service	Use this form to order the secure gateway (SG) service. This is a network-based service that securely connects the customer's private network to the public internet through a logical, virtual port (universal port).
Network Services	Server or Network device monitoring - (Add, Remove, Suppress)	Request Server or Network to be added or removed from monitoring, modifications to existing monitoring configurations and monitoring suppressions.
Network Services	Static IP Address Request/Release	User requests/releases a Static IP Address
Network Services	Telecommunications service priority (TSP) coding	Telecommunications service priority (TSP) is a U.S.-only program that authorizes national security and emergency preparedness (NS/EP) organizations to receive priority treatment for vital voice and data circuits or other telecommunications services.
Network Services	Third-party Postage Machine Installation and Network Connection	This form is used to request a third-party postage machine connection to the Commonwealth of Virginia (COV) network. A third-party postage machine is defined as any postage device that is not owned by VITA's service supplier or does not have an associated billable Resource Unit (RU).

Service Category	Service Name	Short description
Network Services	Wide Area Network (WAN) Analysis Reporting	The Wide Area Network (WAN) Analysis Reporting will allow authorized agency users to request access to view historical, as well as current, network analysis and to access multiple reporting options. This tool only supports agency sites that have undergone modernization.
Other Catalog Needs	Add/Move/Change for Site Information	
Other Catalog Needs	AITR/ISO Update Request	Use this form to add or remove Agency or STS AITRs or ISOs.
Other Catalog Needs	Building Maintenance	This request will notify all IT Infrastructure Service Platform (ITISP) Service Providers and Users of planned maintenance.
Other Catalog Needs	CMDB Configuration Item (CI) Update Request	Modifying configuration items (CI) in the configuration management database (CMDB)
Other Catalog Needs	DBHDS Requests	
Other Catalog Needs	DCAR Upload	This Record Producer will allow you to upload Dynamic Catalog Approval Routing configurations from an excel template.
Other Catalog Needs	General Service Request	Cannot find what you're looking for elsewhere in the service catalog? Utilize this form.
Other Catalog Needs	Service Catalog Form Maintenance Request	This form is used by suppliers to request the creation, modification or removal of a form in the VITA service catalog.
Other Catalog Needs	ServiceNow Feature Request	This form is used to request enhancements, report defects, or request the ServiceNow Tools Team to perform a task within ServiceNow.
Personal Computing	Agency Specific Device	A PC the agency needs that is not a standard PC offering
Personal Computing	Asset Install	Use this form to request that existing devices be installed onsite.
Personal Computing	Asset Move	This form allows users to move assets from one site to another.
Personal Computing	Asset Removal	This form allows users to complete up to 20 agency asset removals on site including desktops, laptops and monitors.
Personal Computing	Asset Tag Replacement	Use this form to order a new asset tag for a device (e.g., if the original asset tag is damaged or missing).

Service Category	Service Name	Short description
Personal Computing	Belkin USB-C Dual Display Dock	Docking Station allows the connection of two HD monitors
Personal Computing	Data Transfer	Use this form to request data transfer from one device to another device. If more than 20 assets require data transfer, please submit a request for solution (RFS).
Personal Computing	Deferred personal computer (PC) refresh re-engagement	This form is used to re-engage agencies in the PC refresh process.
Personal Computing	Dell 130-Watt Type-C 3-Prong AC Adapter with 3.2 ft Power Cord	Dell Charger
Personal Computing	Dell 24in Monitor - P2422H	Dell Monitor
Personal Computing	Dell 27in Monitor - P2722H	Dell Monitor
Personal Computing	Dell 45-Watt 3-Prong AC Adapter with 1 meter Power Cord	Dell Charger
Personal Computing	Dell 65 Watt 3-Prong AC Adapter with 6 ft Power Cord	Stop lugging your AC adapter back and forth between home and office. Get a second AC adapter for your notebook and keep one in the office and one for home or travel.
Personal Computing	Dell 90-Watt Type-C Adapter with 1M Power Cord	Model #492-BCBK

Personal Computing	Windows 10 Semi-Annual Channel (SAC) Approval	Use this form to provide approval for a Windows 10 semi-annual channel (SAC) operating system (OS) update.
Printer Services	Follow Print Service (FPS)	The follow print service (FPS) provides print management workflows for authentication, desktop printing and secure printing and reporting from any enabled device in the user's agency.
Printer Services	HP Color LaserJet Enterprise M555DN	This category 2 networked single-function printer is a desktop model with color print capability that is suited for moderate use. This device prints 40 pages per minute on up to 8.5x14" paper. Xerox catalog devices are 60-month leases, and the associated accessories must be ordered with the initial device request. Also, the printer needs to be networked to gain the benefit of all features.
Printer Services	HP Color LaserJet Pro M454DN	This category 1 networked single-function printer is a desktop model with color print capability that is suited for low use. This device prints 35 pages per minute on up to 8.5x14" paper. Xerox catalog devices are 60-month leases, and the associated accessories must be ordered with the initial device request. Also, the printer needs to be networked to gain the benefit of all features.
Printer Services	HP LaserJet Enterprise M611DN	This category 4 networked single-function printer is a desktop model with black and white print capability that is suited for high use. This device prints 65 pages per minute on up to 8.5x14" paper. Xerox catalog devices are 60-month leases, and the associated accessories must be ordered with the initial device request. Also, the printer needs to be networked to gain the benefit of all features.

Service Category	Service Name	Short description
		capability that is suited for low use. This device prints 40 pages per minute on up to 8.5x14" paper. Xerox catalog devices are 60-month leases, and the associated accessories must be ordered with the initial device request. Also, the printer needs to be networked to gain the benefit of all features.
Printer Services	HP LaserJet M610DN	This category 3 networked single-function printer is a desktop model with black and white print capability that is suited for moderate use. This device prints 55 pages per minute on up to 8.5x14" paper. Xerox catalog devices are 60-month leases, and the associated accessories must be ordered with the initial device request. Also, the printer needs to be networked to gain the benefit of all features.
Printer Services	Printer - MACD (Move, Dispose)	This form is used to request moves of networked multifunction or single-function printers within an office or to request disposal of any networked multifunction or single-function printer in the VITA MPS program.
Printer Services	Printer – Consumables	Use this form to request consumables for a networked multifunction or single-function printer.
Printer Services	Xerox B405DN	This category 1 multifunctional print device is a desktop model with black and white print capability that is suited for low use. This device prints at 47 pages per minute on up to 8.5x14" paper. Xerox catalog devices are 60-month leases, and the associated accessories must be ordered with the initial device request. Also, the MFD device needs to be networked to gain the benefit of all features.
Printer Services	Xerox B7035H	This category 1 multifunctional print device is a floor standing model with black and white print capability that is suited for low use. The device prints at 35 pages per minute on up to 11x17" paper. Xerox catalog devices are 60-month leases, and the associated accessories must be ordered with the initial device request. Also, the MFD

Printer Services	Xerox VersaLink C8000DT	This category 4 networked single-function printer is a desktop model with color print capability that is suited for high use. This device prints 45 pages per minute up to 12x18" paper and banners on up to 12x52" paper. Xerox catalog devices are 60-month leases, and the associated accessories must be ordered with the initial device request. Also, the printer needs to be networked to gain the benefit of all features.
Request for Solution	Managed software-defined wide area network (SD WAN)	Managed software-defined wide area network (SD WAN) enables the seamless connection of multiple technologies, creating a consistent user experience by leveraging Ethernet and broadband networks. Working across any type of connection, SD WAN offers the capability to manage the application and not the device. Adaptive software-defined policies enable intelligent traffic routing that takes into account performance, security requirements, dynamic real-time network conditions and utilizing low cost connections for non-mission-critical applications.

Service Category	Service Name	Short description
Request for Solution	Request for Estimate	Request for Estimate - Rough Order of Magnitude (ROM)
Request for Solution	Request for New or Modified Enterprise Service	This form enables customers to provide requirements for a solution or service that do not have a specialized requirements document or are not able to be requested using the VITA service catalog. Requests for other services should be made using the service catalog or one of the other request for solution forms.
Request for Solution	Request for Solution: Cloud Services	This form enables customers to provide requirements for a solution or service that do not have a specialized requirements document or are not able to be requested using the VITA service catalog. Requests for other services should be made using the service catalog or one of the other request for solution forms.
Request for Solution	Request for Solution: Early Refresh/Upgrades to Workstations	This form is only to be used if the customer is requesting an early refresh, requesting an upgrade to a PC on the standard catalog, or is requesting over 20 standard workstations.
Request for Solution	Request for Solution: General Requirements	This form enables customers to provide requirements for a solution or service that do not have a specialized requirements document or are not able to be requested using the VITA service catalog. Requests for other services should be made using the service catalog or one of the other request for solution forms.
Request for Solution	Request for Solution: Move/New Location	This form enables customers to request a solution for relocation, reconnection, and disconnection services. This requirements form is limited to requesting a proposal for this service (move or new location) only. Requests for other services should be made using the service catalog or one of the other RFS forms.
Request for Solution	Request for Solution: Network	This form enables customers to request a solution (RFS) for data network services and infrastructure. This requirements form is limited to requesting a proposal for this service. Requests for other services should be made using one the service catalog or one of the other RFS forms.

Service Category	Service Name	Short description
Request for Solution	Request for Solution: Workstation Repair	This form is only to be used if the customer is requesting a repair of an broken workstation. This form enables customers to provide requirements required for a workstation to get repaired. Customer must have already opened an incident for the damage prior to the submittal of this form.
Security Services	Application and source code security	The application and source code security is a cloud-based service for securing applications across the enterprise. It offers a complete application security program that spans the software development life cycle (SDLC), from initiation, to test, to production. The service consists of plugins that give developers continuous flaw feedback while coding, scanning of application's source or binary code, assessment of third-party components, automated vulnerability scans for live sites and training around software security.
Security Services	Application Process Whitelisting	The application whitelisting service will incur an ongoing monthly charge per workstation or server. Application whitelisting is a compensating control for systems running at an elevated level of risk by allowing only authorized applications and processes to execute.
Security Services	Centralized Information Security Officer (ISO) Service	The Centralized Information Security Officer (ISO) service will assist agencies in performing and documenting: Business Impact Analysis and IT System Security Plans (consisting of IT Security Risk Assessment and Risk Treatment Plans) including required annual updates. ISO Service analysts will also be able to provide consulting and other ISO services.
Security Services	Centralized IT Audit Service	Agencies may contract for IT security audits to be conducted through this service. The audits will be performed in accordance with commonwealth IT auditing standards and will be compliant with the requirement to have a sensitive IT system audited (at least once every 3 years).

Service Category	Service Name	Short description
Security Services	Compliance testing network (CTN) - Report request	This form allows agencies to request an agency compliance report for the compliance testing network (CTN) service offered by managed security services using the Forescout tool.
Security Services	Compliance testing network (CTN) - Report request	This form allows agencies to request an agency compliance report for the compliance testing network (CTN) service offered by managed security services using the Forescout tool.
Security Services	COV Audit Coordination Request	Use this form to request the completion or retrieval of artifacts prior to an audit beginning and the remediation of corrective action plans after an audit has been completed.
Security Services	Cyber Threat Management	This form is used by the Service Towers to report current and emerging threats.
Security Services	Data Tokenization	Single license for tokenization which protects sensitive data by replacing it with a unique token.
Security Services	Enhanced Data Loss Prevention	This form enables customers to provide requirements for the enhanced data loss prevention (DLP) service. Enhanced DLP monitors and prevents confidential data loss. It also provides quick monitoring of real-time events, centrally managed security policies to control how employees use and transfer sensitive data, and generates detailed forensics reports with minimal impact to daily business activities. This service does not protect against data leakage via email.
Security Services	Enterprise remote access: Third-party virtual network connection	Third-party virtual network connection is for a site that requires a secure connection to a remote resource. This service is similar to site-to-site virtual private network (VPN).
Security Services	File Level Encryption	File Level Encryption provides transparent and automated file-system level encryption for end user workstation directories, shared drives and removable media such as USB drives. The solution encrypts unstructured, sensitive data in the specified files and folders.
Security Services	Managed Firewall New, Refresh	This form is to be used by the managed security supplier to manage systems associated with the implementation and refresh of a firewall asset.

Service Category	Service Name	Short description
Security Services	Managed Firewall Services 100Mb	Small firewall.
Security Services	Network firewall rule – Complex (15 or more rules)	This form is for eligible customers to request the implementation of new network managed firewall rules, the change of existing firewall rules, or the removal of existing firewall rules.
Security Services	Network Firewall Rule – Simple (14 rules or less)	This form is for eligible customers to request the implementation of new network managed firewall rules, the change of existing firewall rules, or the removal of existing firewall rules.
Security Services	Secure Sockets Layer (SSL) Server Certificate Service	The Secure Sockets Layer (SSL) Server Certificate Service allows VITA customers and suppliers to order public-facing Certificate Authority (CA) and internal secure certificates (CA or self-signed) for support of applications. The service provider may alter the certificate type requested to comply with VITA security requirements based on the application use.
Security Services	Special Agency Clearance Request	This form is used to request service tower supplier access (clearance) to agency systems. This request should be submitted by the service tower supplier ISO.
Security Services	Specialized Managed Firewall Services	Medium and/or large firewall services.
Security Services	System or Application Log File Request	Request log files from VITA platform systems or applications
Security Services	VITA Baseline Hardening Standard Implementation	Use this form to implement newly approved VITA baseline hardening standards or changes to those standards.
Security Services	Web Application Vulnerability Scanning Services	Multiple levels of service are available. Please review the service description page for details.
Security Services	Web Proxy Whitelist for Workstations	Use this form to whitelist a URL. This service is only provided for access to URLs, via COV workstations.
Security Services	Workstation Encryption	Workstation Encryption provides the Commonwealth whole disk encryption for personal computing devices. This service comes built into Commonwealth laptops and tablets and is an optional enhancement for desktop computers.

Service Category	Service Name	Short description
Server Services	Batch Process	This form can be used to request information related to a batch job or process. This catalog form should be used by current subscribers.
Server Services	Data Center Cross Connect	Data center cross connects links hardware at supplier data centers, used to provide the services. This form enables customers to provide requirements for a solution or service that do not have a specialized requirements document.
Server Services	Database Logical Administration	Database logical administration is a support service for Microsoft SQL or Oracle database assistance for COV agencies not currently managed through physical database administration full service support.
Server Services	Database Physical Administration	Order one instance of Microsoft SQL, Oracle database, or Oracle cluster installation, monitoring, tools, patching, backups and upgrades necessary to manage and maintain the physical standalone database instance.
Server Services	Disaster Recovery (Server) - NEW and MODIFY	Order NEW instances of disaster recovery (DR) for new or existing servers OR MODIFY instances of disaster recovery (DR) for existing servers. Identify DR tier and amount of storage required. Agencies should consider all critical business needs of the application that will be placed on DR. Dependencies considered include multiple servers, mainframe services and any public cloud services.
Server Services	EAPS End-User Concurrent Subscription	ADD new concurrent user license to the enterprise application publishing service (EAPS) instance. The enterprise service enables customers to utilize a shared Citrix infrastructure by providing virtual desktop or application to a user, regardless of their location.
Server Services	EAPS Instance - NEW	The enterprise application publishing service (EAPS) service enables customers to utilize shared Citrix infrastructure to present a virtual desktop or application to subscribed users. The service consists of published application(s), concurrent user licenses per number of users

Service Category	Service Name	Short description
		identified and total storage costs, based on customers' requirements during initiation phase.
Server Services	Enhanced Database Security (EDS) - MODIFY	Enhanced security for one instance of Microsoft SQL or Oracle database using enhanced security software. Includes monitoring and configuration updates in collaboration with the customer to evaluate and implement security patches released by the EDS software vendor necessary to manage and maintain the solution. Includes initial set-up and startup of the service.
Server Services	Large File Transfer (LFT)	The Large File Transfer (LFT) is a web based application that allows users to send and receive large files that are typically blocked due to size by e-mail systems. The service is available to all COV users with a COV mailbox and provides reliable delivery with checkpoint restart and integrity check and web browser integration.
Server Services	NAS at Agency Datacenter - NEW	NAS (network-attached storage) file system provisioned at agency datacenter, as available, over the commonwealth's network using CIFS or NFS protocols using tier two storage. Customer will identify amount of storage required and other parameters as listed on service catalog.
Server Services	NAS at Central Datacenter - MODIFY	Modify existing NAS (network-attached storage) file system provisioned at primary datacenter over the commonwealth's network using CIFS or NFS protocols using tier two or tier three storage. Customer will identify amount of tier storage to increase or decrease and other parameters as listed on service catalog.
Server Services	NAS at Central Datacenter - NEW	Order one NEW instance of NAS (network-attached storage) file system provisioned at primary datacenter over the commonwealth of Virginia network using CIFS or NFS protocols using tier two or tier three storage. Customer will identify amount of storage required and other parameters as listed on service catalog.
Server Services	Physical Server - NEW and MODIFY	Add NEW or MODIFY existing physical server instance located at the primary or agency data center. VITA enterprise architecture physical

Service Category	Service Name	Short description
		server exception approval by the VITA CIO required. Subject to recurring hardware service charge (HSC).
Server Services	Restore Requests	Use this catalog item to request file restores from servers or network attached storage (NAS).
Server Services	Secure Rack	Secure rack hosting allows Commonwealth agencies to host third-party hardware that provides services to the Commonwealth. This service also includes the option of redundant 30 AMP and redundant 50 AMP power to the rack-hosted equipment. This form enables customers to provide requirements for a solution or service that do not have a specialized requirements document.
Server Services	Server Decommission	Use this request form to decommission physical and virtual servers located at agency datacenter and/or primary datacenter locations. The requested decommissioned server should not be currently used in a production capacity and all operations must already be suspended or moved to a new server. The agency AITR must approve the decommission request.
Server Services	Smart Hands	Smart hands is the labor only hourly charge for technical services provided in primary data centers.
Server Services	Storage Area Network (SAN) - Add or Expand	Use this form to request storage area network (SAN) expansion or new logical unit number (LUN) for existing physical primary & disaster recovery server information.
Server Services	Unisys Oracle private cloud service	Use this catalog item to request a virtual server build in the Unisys Oracle private cloud. The Unisys Oracle private cloud extends the capabilities to service Oracle core licensed workloads and offers a memory-rich option for other servers that require large memory allocations and are not candidates for the shared resource virtualization platform.
Server Services	Virtual Server Windows or Linux at Agency Datacenter - New or Modify	Single instance of a virtual server with MS Windows Server or Linux-based (e.g. RHEL, UNIX etc.) located at the agency data center per supplier's standard build. Customers choose the

Service Category	Service Name	Short description
		required operating system and version, number of virtual CPUs (vCPUs), amount of virtual RAM (vRAM) and virtual disk (vDISK) required. vDISK may be provisioned using physical SAN or virtual SAN (vSAN) depending on the deployed solution.
Server Services	Virtual Server Windows or Linux at Central Datacenter - MODIFY	Modify compute profile of an existing single instance of a virtual server hosted at the commonwealth central data center by increasing or decreasing the number of virtual CPUs (vCPUs) and amount of virtual RAM (vRAM); adjust, add or remove vDISK storage. Recurring pricing adjusted per new selections.
Server Services	Virtual Server Windows or Linux at Central Datacenter - NEW	Order NEW instances of one to three virtual server(s) with MS Windows Server and Linux-based at the commonwealth's central data center. Customers choose the server profile, operating system version and compute profile (vCPUs, vRAM, and vDISK sizing).
Service Accounts	Local Account Rights Request	Use this form to request local admin access to specific COV assets.
Service Accounts	ServiceNow Delegate User	Use this form to grant delegated access to a user in the VITA service catalog.
Service Accounts	Test Account Request	Use this form when requesting to create, modify or disable a COV test account.
Service Accounts	UNIX-Linux Admin Account Request	The admin account is used to log on to a UNIX and/or Linux server(s) when elevated privileges are required.
Service Accounts	UNIX-Linux Standard Account Request	This is an account that is used to logon to a UNIX and/or Linux server(s). Users who hold IT support roles that grant them a standard level of access.
Service Accounts	zz/aa Admin Account Request	Use this form when requesting to create, modify or disable a "zz" or "aa" account.
Software as a Service (SaaS)	Box Content Management Service	Box content management is a platform used to access and share digital content. Box is a cloud-based, user-centric platform that enables users to easily share, manage and secure their content using any device.
Software as a Service (SaaS)	Robotic Process Automation	Robotic process automation (RPA) is a software technology that emulates human actions

Service Category	Service Name	Short description
		interacting with digital systems and software. It gives agencies a low-code/no-code way to train and deploy a “robot” or digital worker/assistant that emulates human interactions across digital systems, to execute business processes at machine speed and with 100% accuracy.
Software as a Service (SaaS)	VITA ePen	VITA ePen is an electronic signature (e-signature) that will allow agencies to add branding and securely obtain signatures on electronic documents (e.g. .pdf and Microsoft products).
Voice and Video Services	Audio Conferencing: Instant Meeting	Use this form to order Verizon’s Instant Meeting. This is a reservation-less audio conferencing service, available for use 24/7. Instant Meeting allows you to host audio meetings of up to 50 participants with a global dial-in number and individual leader and participant passcodes.
Voice and Video Services	Jabber	Use this form to add Jabber phone lines to existing service.
Voice and Video Services	UCCaaS	UCCaaS is a hosted and managed unified communications service based on Cisco's hosted collaboration solution (HCS). UCCaaS offers enterprise-grade call control, voice mail, instant messaging, presence and enterprise mobility. Multiple phone models are also included with the monthly service rate.  UCCaaS requires a MPLS connection and has inherent built in failover feature.
Voice and Video Services	UCCaaS - Reset Voicemail PIN	Unified communication and collaboration as a service (UCCaaS) users have several self-service methods in which their voicemail personal identification number (PIN) may be reset. This form enables an agency requestor or account user to submit a service request to reset a voicemail PIN.
Voice and Video Services	UCCaaS – Unity Message Relay feature	Unity Messaging Relay is an optional feature that is part of the unified communication and collaboration as a service (UCCaaS) service. This popular feature allows seamless voicemail forwarding from a user's UCCaaS desktop phone

Service Category	Service Name	Short description
		to their COV email account. Please use this form to enable this feature for an existing UCCaaS phone number.
Voice and Video Services	Virtual Communications Express (VCE)	Virtual communications express (VCE) is a cloud-based voice over internet protocol (VoIP) communications service.
Voice and Video Services	Virtual Contact Center (VCC)	Virtual contact center (VCC) is a cloud-based suite of contact center services. It centralizes contact center services into one tool and mitigates investing in software, hardware and support personnel. NICE InContact is the tool/platform agencies use to utilize VCC. Agencies use their internet browser to access NICE InContact. Agencies can reach their customers via phone, email, SMS, social media or their website.
Voice and Video Services	VoIP - MACD (Move, Add, Change, Disconnect)	Use this form to request a change or disconnect to an existing voice over internet protocol (VoIP) service.
Voice and Video Services	WebEx Conferencing - Single Account	Use this form to order Webex. Webex provides a single, user-friendly solution for audio conferencing, document sharing, online meetings and collaboration.
VPN	Bulk Hard Tokens	Request hard tokens for Customer-maintained inventory at Customer site. Tokens are used to provide multi-factor authentication (MFA) for access to the Enterprise environment.
VPN	Multi-factor Authentication (MFA) Token	Request a new token for an end user account. Tokens are used to provide multi-factor authentication (MFA) for access to the enterprise environment. (Soft or hard token)
VPN	Reassign/Revoke Token	Assign, reassign or remove an existing hard/soft token to an end user's account. Tokens are used to provide multi-factor authentication (MFA) for access to the enterprise environment.
Workplace Collaboration Services	Microsoft - Support	Submit this form to request updates to the setup or configuration of Microsoft services.
Workplace Collaboration Services	Microsoft Support for Google Users (Non-Exchange) - Subscription	Enterprise collaboration services (ECS) offers Microsoft support for Google users (non-exchange). This service offering includes Microsoft SharePoint, OneDrive, Teams and other

Service Category	Service Name	Short description
		<p>collaboration applications. Please use this form to subscribe your agency to the Microsoft support for Google users (non-exchange) service.</p> <p>Note: Use the Microsoft support for Google users (non-exchange) – Support request to add or remove users from your agency's SharePoint allow group.</p>
Workplace Collaboration Services	VITA enterprise services (VES) – Consulting services	<p>VITA enterprise services (VES) consulting services provides application development using the Office 365 platform (SharePoint and Teams) and SharePoint support services for our customer agencies. This service is available to current VES customers.</p>
