ADDENDUM 8 TO APPENDIX 5 TO SCHEDULE 3.3
TO THE
COMPREHENSIVE INFRASTRUCTURE AGREEMENT
NETWORK ATTACHED, LARGE VOLUME COPIER SERVICE
**OVERVIEW**

This expansion to the scope of the existing Desktop Services is to include support of Network Attached, Large Volume Copiers. Copier solutions are categorized to align with technology and throughput demands created by variations in user group populations.

**Technical Description**

This technical solution categorizes Large Volume Copier assets based on their determined value inclusive of functionality and the scope of services they provide. In order to logically structure Resource Unit rates according to the level of services provided by the asset, specific categories have been developed based on employed technology and service support data. Copiers can then be procured, or allocated to categories based on specifications, capabilities, and expected service output.

**Components**

The solution consists of six (6) categories. The figure below illustrates the copier categories (1-6) for Large Volume Copiers relative to the service provided.
