

Executive Directive #7: Leveraging the Use of Shared Data and Analytics

Jay Smith
VITA Data Analytics Program Management

September 12, 2016

ED7 Report – October 15, 2016

1. Comprehensive review of legal, privacy, and governance concerns as they relate to data sharing
2. Recommendations on how to make data generated by state agencies more accessible and usable by state government and the public as open data
3. Recommendations for data sharing governance, ethical use and authority
4. Recommendations of key analytics projects providing the highest likelihood of realizing value demonstrated by cost savings and better outcomes

Timeline

<u>Weeks</u>	<u>#</u>	<u>Dates</u>	<u>Milestones</u>
1-2	2	6/13 - 6/24	Stakeholders, Base Plan, Communication & Data Collection Prep
3-7	5	6/27 - 7/29	Data Collection, Follow Up, Assimilation

13-16	4	9/5 - 9/30	Multi-Tier Review Cycles
17-18	2	10/3 - 10/14	Updates & Final Publication

Data Collection

- Data Collection Input
 - Data Analytics Tools
 - Data Asset Sharing Insight & Concerns
 - Key Analytics Projects
- Focus Groups (12)
 - Cross Secretariats
 - 70+ Participants

Focus Questions

- Share with us examples of data sharing relationships between your agency/organization and other entities. What type of legal, privacy, and governance constraints have impacted the data sharing relationship? Does your agency/organization have policies in place to facilitate data sharing?
- How does your agency/organization handle data sharing governance, particularly ensuring the necessary authority to share data and ethical use of the shared data? What recommendations would you have for other agencies or executive leadership of the state government relating to data sharing governance, ethical use, and authority?
- An important component of ED7 relates to “open data” or data that agencies could make readily available to the public. Does your agency/organization publish “open” data for public use? What barriers does your agency/organization face when attempting to make data more accessible by the public? How has it overcome those barriers?
