

Enterprise Data Management Person Core Non-Matching Data Exchange Standard

Joseph W. Grubbs, Ph.D.
Commonwealth Data Governance

Presentation to the
Health Information Technology Standards
Advisory Committee (HITSAC)
December 15, 2011

Purpose of the Data Standard

- To identify attributes that may be maintained in the Person hub of the Enterprise Data Management tool but may not be used for matching purposes
- To structure attributes that will support validation of matches, resolution of linkage tasks and exchange of Person data through the Enterprise Data Management solution
- To define the attributes consistent with HL7 and external standards for messaging and data exchange
