

Information Security Awareness Month at DMV October 2008 – Summary

At the end of September DMV-Branded Multi-State Information Sharing and Analysis Center (MSISAC) posters were sent to all Customer Service Centers, Weigh Stations, and Headquarters.

The posters will remain up for the month of October. As there is no date information on the posters, folks have been told that they are free to keep them up longer than for the month of October.

An email introducing DMV’s Cyber Security Awareness Week was sent to all employees on September 24.

On October 2, an email and PowerPoint Presentation were sent to all Information Technology Services (ITS) staff. The presentation covered some of the changes in SEC501-01 – specifically Data Protection and Application Security. The staff has until November 14 to review the presentation and return the completion certificate to the ISO.

DMV’s intensive information security awareness activities were scheduled for our Cyber Security Awareness Week – October 6 – 10.

DMV Cyber Security Awareness Week – 10/6/08 – 10/10/08 - Schedule
