

# Virginia Base Mapping Program (VBMP)

2009-2012 | Geospatial Products and Data

Total Geospatial Solutions  
1.866.SANBORN | www.sanborn.com

The 2009-2012 Virginia Base Mapping Program (VBMP) fulfills VGIN's charge of developing a statewide orthophotography base map and managing it as an ongoing, four year program that is a resource for state and local government entities, both public and private. This product is the basis that enables consistency for the development of geospatial products and data that are produced in the Commonwealth.

The VBMP includes other geospatial framework data beyond the orthophotography base map. The VGIN/Sanborn Team, via the 2009-2012 VBMP, will support coordination of statewide GIS at all levels of government, and the development of enterprise geospatial services on behalf of the Commonwealth of Virginia. State and local government entities have come to depend upon VGIN to provide quality base orthophotography and supporting DTM through the VBMP.

A high-level overview of the base products, optional products, delivery options and participation information for the 2009-2012 VBMP can be found below. Additional sheets are available that contain more detail about the program's various geospatial products and services.

### Base Products

Flights will occur in 2009 in the eastern portion of the State and 2011 for the western portion of the State. Off-year flights are available during 2010 and 2012 or out of the core flight areas during 2009 and 2011. The base products are listed below.

#### Standard:

1-foot resolution orthophotography 200 Scale

#### Upgrade:

6-inch resolution orthophotography 100 Scale

#### Upgrade:

3-inch resolution orthophotography 100 Scale

### Optional Products and Services

In addition to the base products, partners may also select from any of the following optional products and services:

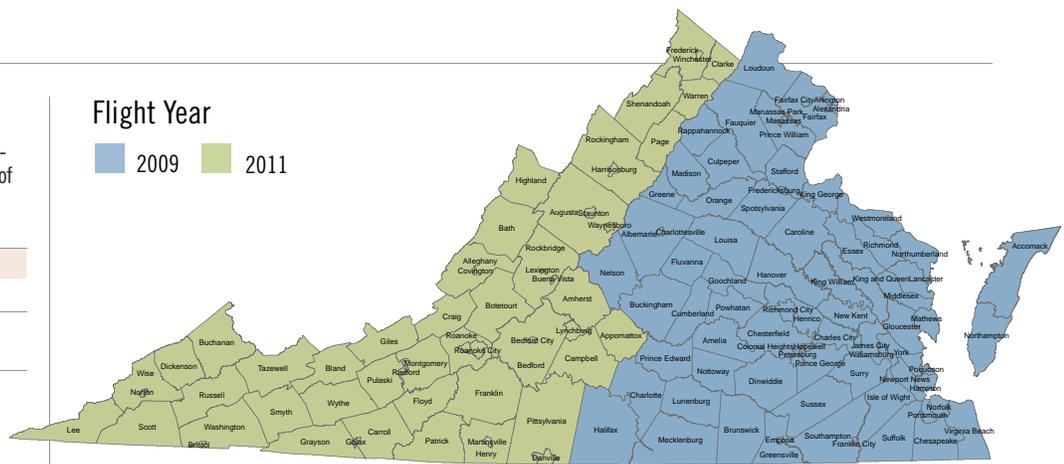

- Resolution Upgrades (see above)
- Contours
- Structures
- Planimetric Data
- True Orthophotography
- Priority Processing and Delivery
- Additional "Off-Year" Flights—2010 and 2012, or outside of core 2009 and 2011 flight areas
- Extended Upgrade Selection Period
- 3D Buildings
- Rapid Response
- Land Cover Mapping
- LiDAR
- Ground-Based LiDAR
- Forestry Applications
- Oblique Imagery

### Delivery Options

Core products will be delivered within 6 months upon completion of the flights. In addition, intermediate county mosaics will be delivered within 60 days, and access to the imagery will also be provided by the Sanborn online QA tool, GeoServe. This tool accelerates the review process and expedites final product acceptance. This web-enabled tool removes the need for the physical transport of initial data to the client site and allows for data to be reviewed and flagged for correction remotely reducing the project timeline.

### Flight Year

2009 2011

### Program Seminars

To attend an educational seminar in your area, please contact:

David Lewis—Customer Liaison  
Office: 540.668.6027  
Cell: 703.819.6012  
Email: dlewis@sanborn.com

### Seminar Dates & Locations

**Culpeper, VA** Tuesday, January 13, 2009 9AM-11AM  
Best Western  
791 Madison Road, Culpeper, VA 22701

**Farmville, VA** Tuesday, January 13, 2009 2PM-4PM  
Hampton Inn  
300 Sunchase Blvd., Farmville, VA 23901

**Norfolk, VA** Wednesday, January 14, 2009 9AM-11AM  
Holiday Inn Select  
1570 Military Highway, Norfolk, VA 23502

**Richmond, VA** Wednesday, January 14, 2009 2PM-4PM  
Crowne Plaza – Downtown  
555 East Canal Street, Richmond, VA 23219

**Abingdon, VA** Thursday, January 22, 2009 2PM-4PM  
The Martha Washington Hotel  
150 West Main Street, Abingdon, VA 24210

Kindly RSVP to [vgin\\_seminar@sanborn.com](mailto:vgin_seminar@sanborn.com) for details and to reserve your spot.

### For Further Information and to Participate

To learn more about the program, please contact us by one of the methods below:
