

CIO of the Commonwealth  
Lem Stewart

## From the CIO

We are all custodians of our citizens' personal data via our IT tools. When the machines become outdated or inoperable, getting rid of them can be a complicated process, because we're responsible for making sure that no personal data remains.

As a governmental entity, you're eligible to use VITA's excellent managed solution for secure handling and destruction of surplus equipment. Read on, then call us - I think you'll see immediate benefits. As always, we look forward to serving you.

Sincerely,

## Use VITA's Contract to Easily Handle Secure Destruction and Surplus of IT Equipment

To assist public bodies in the Commonwealth in complying with data destruction policies, VITA and DGS partnered to solicit a managed solution to wipe, resell, donate, and/or recycle IT equipment. The resulting contract with DynTek provides an easy to use, web-based solution that also amply protects government and citizen data from inadvertent disclosure.

- DynTek assumes all liability upon pick-up
- Online system allows estimation of disposal costs and tracking of assets through the process
- Multiple locations easily managed by vendor
- Destruction certificates provided

*Get rid of this headache easily!*

### What Customers Are Saying:

Thanks to Dyntek and VITA for the ability to surplus old desktop PC's in a manner that is faster, more concise, and easier. I had neither manpower nor space to wipe approximately 400 PC's in our home office and 80 PC's per region. I had only 1 week to provide new PC's. Dyntek rolled in, picked up the old units from each of our 9 regional offices, and provided me with a list of items to subtract from my inventory. In addition to having the PC's out of our way, DEQ was able to recover money from the sale of the surplus items. Thanks again for this valuable service!

*John Rigdon, DEQ Desktop Support / Helpdesk*
